**Notes:**

- MELAA Ethnicity stands for Middle Eastern, Latin American, and African.
- Ethnic groups that the student belongs to code to: European/Pākehā, Māori, Pacific, Asian, MELAA and Other. Students can identify with three ethnicities: students who identify with more than one ethnic group are counted in each group they identified with. Therefore, the number of students in the 'Total' column will generally be less than the sum of the students in each group.
- **The data shown in the table above does not explicitly exclude students who left a school to progress to an intermediate or secondary school at the end of a year.**
