

**Table 8885:** Percentage of targets met for Māori, non-Māori, and total groups for contact-tracing performance indicators for community cases from 14 – 26 February 2021.

Indicator	Refined indicator description	Target	Māori (%)	Non-Māori (%)	Total (%)
<b>S001</b>	Time from exposure to contact isolation / quarantine	≥ 80% within 96 hours	50	51	51
<b>S002</b>	Time from case first symptom to contact isolation / quarantine	≥ 80% within 96 hours	50	54	53
<b>S003</b>	Time from test sample taken to close contact isolation / quarantine	≥ 80% within 72 hours	90	94	93
<b>S005</b>	Proportion of close contacts with confirmed or suspected covid-19 at the time of tracing	< 20% of close contact are confirmed, probable or suspected when traced	0	6	6
<b>C001</b>	Time from first symptom to test sample taken for positive cases	≥ 80% within 48 hours	-	67	67
<b>C002</b>	Proportion of cases and contacts who adhere to isolation / quarantine	≥ 90% isolation / quarantine maintained throughout period	100	100	100
<b>L001</b>	Time test sample taken to notification of positive result	≥ 80% within 24 hours	-	67	67
<b>P001</b>	Time notification to case interview	≥ 80% within 24 hours	-	100	100
<b>P002</b>	Time case notification to isolation / quarantine of contact	≥ 80% within 48 hours	75	83	83
<b>P003</b>	Time from close contact identification to isolated/quarantined	≥ 80% within 24 hours	90	95	95
<b>P004</b>	Proportion of contacts traced	≥ 80% within 48 hours	75	83	83

<b>P005</b>	Regular monitoring and follow-up of cases and contacts completed	≥ 90% monitoring of contacts is successful	80	90	90
-------------	--	--	----	----	----

- Performance data provided in this table is from date the first South Auckland community case was reported (14 February) to 26 February.
- Data is not available for metrics where there is no data that meets the definition.
- These metrics do not include casual contacts.
- The system and community level indicators **S001**, **S002**, and **C001** are low due to delayed identification of cases following symptom onset. However, **S003** shows that once a case has been identified the system performance is above target.
- For the laboratory level indicator (**L001**), all results were notified within 48 hours of the test sample being taken.
