

Table 20367 (2026). How many Enrolled Nurses from the end of year intake remain in the Advanced Choice of Employment talent pool to date, broken down by entries, exits and net change since the pool opened?

Entry Point	Number of ENs Entered in talent pool	Number of ENs Employed through talent pool	Number of ENs Exited talent pool: Other reasons	Numbers of ENs remaining in talent pool
August 2025 Entry	99	28	13	58
Previous ACE EN Entry Points	305	161	24	120

Notes:

- Data extracted 25 May 2026.
- Advanced Choice of Employment (ACE) Enrolled Nurses (EN) does not operate a match process. It operates as an open-ended talent pool, with two to three entry points each year. Applicants can remain in the talent pool for up to two years from their entry point, until they gain employment or become ineligible.
- ACE EN data is limited to the employment updates we receive from districts and graduates.
- ACE is only advised once a graduate has accepted an offer while in the talent pool. ACE does not hold record on the number of offers made, declined, or the number of applicants who may have received offers without accepting.
- Other reasons for applicants exiting the Talent Pool include withdrawal due to employment elsewhere, no reason being provided, reaching the end of eligibility to remain in the Talent Pool, or failing the State Final Examination.
- Employers continue to hire applicants from the talent pool when vacancies arise.
