Notes:

- This is a count of grants. A client can have more than one grant in the time period.
- Amount granted is not necessarily the amount spent.
- To protect confidentiality the Ministry of Social Development uses processes to make it difficult to identify an individual person or entity from published data.
- These data tables have had random rounding to base three applied to all cell counts in the table.
- The impact of applying random rounding is that columns and rows may not add exactly to the given column or row totals.
- The published counts will never differ by more than two counts.
- Ethnicity data is self-identified and multiple ethnicities may be chosen by an individual as fits their preference or self-concept.
- Total response ethnicity means that if a person identifies with more than one ethnic group, they are counted in each applicable group.
- Because a client can choose more than one ethnic response, the total number of ethnic responses will be greater than the number of clients.
- 'Not Specified' is where ethnicity is not recorded.
- 'Other ethnicity' is where ethnicities fall outside the reported ethnicities.
