Notes:

- This is a count of grants and declines. A client may have more than one grant or decline within a period.
- To protect confidentiality the Ministry of Social Development uses processes to make it difficult to identify an individual person or entity from published data.
- These data tables have had random rounding to base three applied to all cell counts in the table.
- Random Rounding does not round to zero. A value of one or two will be rounded to three.
- The impact of applying random rounding is that columns and rows may not add exactly to the given column or row totals.
