

Table 7757 (2026). How many patients for each incentre haemodialysis unit operated by Health New Zealand, as at the last day of each month for the past six months, (i) were receiving incentre haemodialysis; (ii) were receiving haemodialysis fewer than three times per week; and (iii) of those receiving fewer than three sessions per week, for how many was this a clinically indicated arrangement?

Total number of Health New Zealand incentre patients in Capital, Coast and Hutt Valley; total number of those receiving haemodialysis fewer than three times per week; and of those receiving fewer than three sessions per week, how many was this a clinically indicated arrangement.

Month	Number of Incentre Patients	Number Patients Receiving less than 3 x week treatments	Clinically indicated to receive less than 3 x week
February 2026	198	9	9
January 2026	201	9	9
December 2025	204	10	10
November 2025	201	9	9
October 2025	197	10	10
September 2025	197	8	8

Note:

- Wairarapa patients get dialysis in the Hutt unit, so are included in CCHV numbers.

Total number of Health New Zealand incentre patients in Hawke's Bay; total number of those receiving haemodialysis fewer than three times per week; and of those receiving fewer than three sessions per week, how many was this a clinically indicated arrangement.

Month	Number of Incentre Patients	Number Patients Receiving less than 3 x week treatments	Clinically indicated to receive less than 3 x week
