Notes:

- This is a count of grants and/or declines. A client can have more than one in a period.
- Applications processed is the total number of applications granted and declined.
- The region 'Other' represents those service centres that do not represent a geographic location such as call centres and processing units.
- To protect confidentiality, the Ministry of Social Development uses processes to make it difficult to identify an individual person or entity from published data.
- Data tables have random rounding to base three applied to all cell counts in the table.
- Random rounding does not round to zero. A value of one or two will be rounded up to three.
- The consequence of applying random rounding is that columns and rows may not add exactly to the given column or row totals.
- The published counts never differ by more than two counts.
