

WPQ 16111 (2026)

Appendix one: The percentage and number of prisons that used coal boilers, LPG, and diesel as a fuel source for heating or energy for each financial year from 2019/20 to 2024/25

Table notes:

- Invercargill was the only prison to run a coal boiler. This boiler was replaced by a pellet boiler in February 2026.
- Some prisons use more than one of the fuel sources in the tables below and some prisons do not use any of them, as they may use reticulated gas, for example.
- These tables exclude data for Auckland South Corrections Facility (ASCF), which is privately managed.

Fuel source	Coal boiler					
Financial year	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
Percentage of prisons	6%	6%	6%	6%	6%	6%
Number of prisons	1	1	1	1	1	1

Fuel source	LPG					
Financial year	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
Percentage of prisons	35%	65%	59%	59%	59%	35%
Number of prisons	6	11	10	10	10	6

Fuel source	Diesel					
Financial year	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
Percentage of prisons	24%	65%	88%	76%	88%	65%
Number of prisons	4	11	15	13	15	11
