

10408 (2026). Camilla Belich to the Minister for ACC: What new artificial intelligence or machine learning systems, tools, or platforms, if any, have been commissioned, contracted, or deployed by any department or entity for which the Minister is responsible since 27 November 2023, listed by system name, supplier, purpose, contract value, and date of commissioning?

The table below shows the standalone artificial intelligence or machine learning systems, tools, or platforms that ACC has commissioned, contracted or deployed since November 2023.

Name	Supplier	Purpose	Contract Value	Date of Commissioning
M365 CoPilot - back-office productivity	Microsoft	Provide AI assistance within Microsoft Office applications. Reducing the cognitive load on staff completing mundane tasks and improving accessibility and reduced fatigue for staff with neuro-diverse needs.	\$1,149,307	January 2024
AI powered learning and development module creation	Articulate 360	Enables Learning & Development team to create learning modules more efficiently, along with ability to seamlessly automate manual tasks with the use of the suite of e-learning development tools.	\$8,860	January 2025

Note on data

- The contracted value includes both actual and committed future spending for these technologies.
