

28082 (2025): How many colonoscopies, if any, were performed in Palmerston North during the period Monday 3 March to Sunday 16 March broken down by venue and by day?

| Palmerston North Hospital | Colonoscopy performed |
|---------------------------|-----------------------|
| 3-9 March                 | 15                    |
| 10-16 March               | 28                    |
| 17-23 March               | 19                    |
| 24-30 March               | 16                    |
| 31-6 April                | 17                    |
| 7-13 April                | 29                    |
| 14-20 April               | 13                    |
| 21-27 April               | 5                     |

Data extracted 4 June 25

Notes: HNZ is unable to show data for each individual day as this could breach the privacy of patients as at times there are fewer than 5 per day.

All colonoscopies were performed at Palmerston North Hospital

Where a date is not listed in the table, there was no clinic running on that day.

Caveat: Data submission for April and May 2025 is current, however it is not complete.

Data for 2025 is not final and should be considered provisional at this stage.

Data submission for May 2025 are not due till late June 2025 hence not included.
