

Appendix One: The number and percentage of sentenced and remand women prisoners who do not have a case manager, as at 30 April 2025, by prison and offence type.

Table notes:

- The number of people in prison fluctuates on a daily basis due to arrests, releases and court decisions. Corrections currently manages approximately 800 women in prison.
- The figures below also include people who have been in prison for fewer than 10 days, and those that have previously had a Case Manager allocated to them, but did not have one allocated to them as 30 April 2025. A person may also be in the process of transferring to another prison, where a Case Manager will be allocated to them after the transfer. At times, allocation to a Case Manager may be delayed due to other professionals supporting them through health issues, or mental health issues.
- Figures are not directly comparable between prisons. Prison populations vary in size and demographics, including security classifications of the people they manage.
- Table two is broken down by most serious offence type, however, people may be imprisoned for multiple offence types.
