Notes:

- This data is based on mammogram appointment dates, from 1 October 2025 until 11 May 2026.
- Data was extracted on 12 May 2026.
- May 2026 is not included in Table 3 as it is an incomplete month. This lowers the total compared to Tables 1 and 2.
- Counts of screening fewer than six have been suppressed with the symbol “<6” to protect privacy.
- Women aged 75 are captured in the screening volumes as a six-month grace period (1 October 2025 to 31 March 2026) was established to ensure women who were aged 74 at the start of the age extension rollout had sufficient time to be invited and receive a final breast screen, even if they turned 75 early in the rollout period.
