

1. **WPQ 56655 (2025) – Camilla Belich to Minister for Sport and Recreation:** How many plants, broken down by species or type, have been hired by each entity for which the Minister is responsible since 27 November 2023, and what were the suppliers and locations for each installation, broken down by month?

Draft reply:

I refer the member to the attached table. The species types are identified from the initial office supply contract. Sport New Zealand's suppliers have advised that display numbers and plant types may differ from the original records due to plant replacement practices. The information provided represents the best available data.

**For the Sport Integrity Commission:**

Prior to January 2025 plants on site were provided by staff at their own cost.

The amount and species/type of plant have remained the same since they were first provided by Outside In, the supplier.

| <b>Species/Type</b>                                | <b>Amount</b> |
|----------------------------------------------------|---------------|
| Howea Fosteriana - with Marble Queen underplanting | 1             |
