Table 2001 (2026). How much funding, if any, has Te Whatu Ora spent on providing specialist or emergency dental care each year for the past 5 years, if any?

Event Type	2020/21	2021/22	2022/23	2023/24	2024/25
Inpatient Acute	$5,708,054	$4,226,642	$1,447,013	$2,127,541	$2,102,351
Inpatient Other	$35,325,221	$31,773,505	$39,205,105	$47,417,538	$62,909,689
Outpatient Dental	$21,313,509	$20,428,251	$23,881,399	$27,013,892	$24,400,011
Outpatient Emergency Dental	$2,059,324	$2,308,369	$1,935,584	$2,056,135	$2,610,687
Special Dental Services for Children and Adolescents	$21,832	$19,767	$40,999	$90,827	$98,918
Totals	$64,427,940	$58,756,534	$66,510,100	$78,705,933	$92,121,655

Notes:

- Data extracted 5 February 2026.
- The response reflects an estimate of activity costs based on volume multiplied by a standardised price that is built from costing information. It is not the actual cost.
- The table provides an estimate of costs (refer qualification above) for Specialist and Emergency Dental patients in Health New Zealand hospitals for the five financial years to 2024/25.
- Only publicly funded, publicly provided activity reported to inpatient and outpatient national data collections has been included.
- All figures are GST exclusive.
- Efficiency factors have been applied to prices for internal purposes and do not therefore necessarily represent actual costs and are subject to the usual caveats of data modelling, averaging, and cost allocation of indirect and overhead costs.
- Health New Zealand reference prices are prepared for internal, administrative purposes to support internal resource allocation, benchmarking and analysis.
