

WPQ 9371 (2026) Camilla Belich – What technology or software systems, if any, used by any department or entity for which the Minister is responsible have been identified as end-of-life, unsupported, or requiring urgent replacement since 27 November 2023, listed by department or entity, system name, purpose, and estimated replacement cost?

System name	Agency	Purpose	Estimated Replacement Cost
Topo Data Dictionary	Land Information New Zealand	The Topo Data Dictionary (TDD) is a reference guide that explains all the feature types used in New Zealand's national topographic database. It defines what each feature is, for example, rivers, roads, buildings, or boundaries, and ensures they are mapped in a consistent and reliable way across the country.	\$22,000 (annual cost)
ArcGIS 10.3 – ArcPy Topo scripts	Land Information New Zealand	LINZ uses a set of in-house Python tools to help manage topographic data. They automate checks and processing, that would otherwise require manual effort.	\$22,000 (annual cost)
Topo Release Toolbox – Data Publishing	Land Information New Zealand	The Topo GUI is a small internal tool that helps staff prepare and check topographic data before it goes on the LINZ Data Service.	\$22,000 (annual cost)
LINZ Maps	Land Information New Zealand	An internal and stakeholder facing application to share and visualise LINZ geospatial data in a variety of work area specific configurations.	~\$20,000
