* 2020 and 2021 data is incomplete and is current from CAS as at 27/09/2021

Please note the following concerning the data contained in this document:

- This data is provided from the road traffic crash database; Crash Analysis System (CAS) version 2.2.0
- Waka Kotahi NZ Transport Agency maintains the Crash Analysis System which is updated once a Traffic Crash Report (TCR) is received from NZ Police sometime after the crash.
- Data is for all Serious Injury crashes for the years 2015 to 2021 as recorded in CAS to date - 27/09/2021.
- Data is limited to crashes on Waiuku Road between Colombo and Domain roads
- A crash, to be recorded in CAS must have occurred on a road. The CAS definition of a road is any street, motorway or beach, or a place to which the public have access with a motor vehicle, whether as of right or not e.g. a public car park.
- Due to the police reporting time frame and subsequent data processing there is a lag from the time of a crash to full and correct crash records within CAS.
- Due to the nature of non-fatal crashes it is believed that these are under-reported, with the level of under-reporting decreasing with the severity of the crash.
- Due to the Covid-19 pandemic, NZ had a 4-level Alert system in place starting from 21 March 2020 NZ was in Alert levels 3 or 4 until 14 May 2020. The amount of traffic on the roads during level 4 lockdown (25 March to 27 April) was greatly reduced, which consequently reduced the number of road crashes,
- 2020 and 2021 data is incomplete.
