

Tale 38642 (2025). Number of local review cases completed and submitted to the Health Quality and Safety Commission by year for the past five years.

Year	Local Review Case Completion
2020	127
2021	156
2022	75
2023	60
2024	98

Please note:

- Case completion is when an individual case has been reviewed by a local group with case issues identified, a summary written and recommendations described, and actions entered by a local mortality review coordinator.
- Local reviews are undertaken for child and youth deaths at the district level. Child and youth cases are mostly reviewed once the Coroner closes the case, which is 2-4 years after the death, therefore cases may still be open four or more years after the event.
