

Written Parliamentary Question 1088 - How many roads, if any, have had to be repaired over summers across the last ten years due to deterioration from heat?

Summer Period	Total Activities
2015	153
2016	123
2017	23
2018	440
2019	180
2020	31
2021	54
2022	39
2023	56
2024	15
	1114

Caveats:

Each 'activity' represents an instance of a contractor attending a particular site on a particular date for the purpose of undertaking maintenance.

Data sourced from State Highway RAMM maintenance Cost Table.

Filtered on activities from 1 Dec to 31 Mar each summer.

Filtered for Faults specifying Bleeding.

May not include all maintenance repairs due to deterioration from heat, only events where the road was bleeding.

Works on the Kaikoura earthquake alternate route may have caused a catch up of deferred maintenance during the 2017 to 2019 period.

Due to summer season still ongoing, entries for the current summer May not be fully copied into State Highway RAMM from supplier databases.
