Caveats
Data is as of 19 April 2026 for reporting years 2020 – 2025 (interim) and has been sourced through administrative data held by the Tertiary Education Commission.
Data is limited to: Learners reported under Sources of Funding: - Student Achievement Component (2022 and before) - Delivery of Qualifications at Level 7 degree and above (2023 and after) Learners enrolled in nursing degree or master's level qualifications that lead to registration as a registered nurse. The qualifications have been sourced from the Nursing Council of New Zealand's list of current approved qualifications and has been applied to historical years.
The 2025 data is interim and has not been finalised. Values are therefore subject to revision as data is updated.
A learner will be counted against each year in which they are enrolled.
All learner numbers in this information request have been rounded to the nearest five. Due to rounding the underlying values may not add up exactly to total values.
Learners can be counted more than once when they are reported in more than one Programme. The totals in the tables remove learners that are counted more than once. Therefore, the sum of learner numbers by individual categories may not equal the totals in the tables, and aggregated percentage values may exceed 100%.
Results are based on information reported through the Single Data Return (SDR) for the purposes of funding tertiary education. The data does not include any reporting outside of the SDR and relies on the accuracy of data reported by TEOs.
This data has been compiled specifically to respond to this question. It uses administrative data collected by the Tertiary Education Commission for the purposes of funding tertiary education and relies on the accuracy of data reported by TEOs. Care should be taken when making comparisons with data collected or compiled for other purposes.
