

WPQ 29740 (2026) Table: The number of households exited Emergency Housing (excluding contracted Emergency Housing) and did not subsequently access housing-related services, broken down by quarter ending March-December 2025.

Month	Unknown destination after exiting emergency housing	
	Number	Percentage
Mar25	51	20%
Jun25	48	18%
Sept25	48	17%
Dec25	63	22%

Notes:

- As this information is generated quarterly, there will be outputs for March, June, September and December 2025 month-end only.
- The modelling is limited to those who have accessed further housing support after leaving emergency housing and households are under no obligation to tell government where they are moving to. For example, we are unable to identify those who have entered a private rental without accessing an Accommodation Supplement.
- Subsequent housing states for clients are reported by the month the emergency housing stay ended, looking at which housing-related services have been accessed up to 60 days later.
