Notes:

- This is a count of grants. A client can have more than one grant in the time period.

- Amount granted is not necessarily the amount spent.
- Ethnicity data is self-identified and multiple ethnicities may be chosen by an individual as fits their preference or self-concept.
- Total response ethnicity means that if a person identifies with more than one ethnic group, they are counted in each applicable group.
- Because a client can choose more than one ethnic response, the total number of ethnic responses will be greater than the number of clients.
- To protect confidentiality the Ministry of Social Development uses processes to make it difficult to identify an individual person or entity from published data.
- These data tables have had random rounding to base three applied to all cell counts in the table.
- Random rounding does not round to zero. A value of one or two will be rounded to three.

Table Two: The total number of emergency housing grants and amount granted for the period 1 January 2024 to 30 September 2024, broken down by age.

- These data tables have had random rounding to base three applied to all cell counts in the table.
- Random rounding does not round to zero. A value of one or two will be rounded to three.
- The impact of applying random rounding is that columns and rows may not add exactly to the given column or row totals.
- The published counts will never differ by more than two counts.

Table Three: The total number of emergency housing grants and amount granted for the period 1 January 2024 to 30 September 2024, broken down by gender.

Emergency Housing	Quarter ending	Gender	Number of grants	Amount granted

		Male	4,083	\$12,667,066
		Quarter total	11,412	\$36,003,958

Notes:

- This is a count of grants. A client can have more than one grant in the time period.
- Amount granted is not necessarily the amount spent.
- From 2 December 2019, The Ministry of Social Development has three options to record a client's or child's gender: Male, Female or Gender Diverse.
- To protect confidentiality the Ministry of Social Development uses processes to make it difficult to identify an individual person or entity from published data.
- These data tables have had random rounding to base three applied to all cell counts in the table.
- Random rounding does not round to zero. A value of one or two will be rounded to three.
- The impact of applying random rounding is that columns and rows may not add exactly to the given column or row totals.
