

IN-CONFIDENCE

WPQ 10392 (2026) Artificial intelligence systems commissioned, contracted, and deployed at Stats NZ since November 2023

System	Supplier	Purpose	Contract value	Date of commissioning
Oracle Guided Learning AI Assistant (add on)	Oracle	Helps Oracle administrators draft internal business messages and routine system communications more quickly. It is used for simple content generation inside Oracle workflows.	Cost of add on is included in the full OGL platform contract of \$98,663 for 18 months	26.02.2025
Azure AI Document Intelligence	Microsoft	Extracts information from scanned forms and documents so staff do less manual data entry. It supports survey processing and improves speed and consistency.	\$48.50 per month	27.02.2025
Salesforce Agentforce - AI coding assistant	Salesforce	Helps developers working on Salesforce generate code, create test classes, and understand existing code. It is a development aid rather than a public-facing system.	No cost	05.03.2025
SonarQube - Security Code Scanning	SonarSource	Checks code for security and quality issues before software is released. It helps teams find problems earlier and reduce risk.	\$960 per month	17.03.2025
Method AI Recycling App (Beta Test)	Method	Helped staff identify the right bin for waste items during a recycling trial. It was used as a small pilot to improve waste sorting in the office.	No cost	04.08.2025
Articulate 360 AI assistant (add on)	Articulate	Helps staff create training material faster by drafting content, quizzes, images, and other learning assets. It supports internal learning and course design work.	Add on is \$428 per user per year and included in full Articulate 360 platform contract of \$50,496 per year	01.10.2025
Microsoft 365 Copilot	Microsoft	Helps staff draft, summarise, and get quick answers and support for everyday work tasks across M365 tooling. Additionally, allows the use of personal agents.	\$5,195 per month for 120 licenses	01.03.2026
GitHub Copilot - AI coding assistant	GitHub / Microsoft	AI-powered coding assistant that helps developers write, understand, and improve code. It provides real-time code suggestions, autocompletion, and can generate code snippets based on natural language prompts.	\$595 per month for 15 licenses	15.03.2026
