

Table One: The number of women prisoners who have started or completed a rehabilitation programme, if any, by rehabilitation service type, for the month of November 2025

Table notes:

- This data provided is manually recorded at each site and is provided to the best of Corrections' ability.
- Some starts and completes that have occurred may not yet be recorded in our database, meaning that this information may be subject to change over time.
- Starts and completes represent the number of unique people who have started or completed a programme during the month.
- Although there are no recorded starts or completes for Psychology Programmes during the month of November it should be noted that women were attending Psychology programmes during this time.
- Some programmes are not scheduled to start and finish evenly throughout the year so those that started during a particular month may not finish their programme during that same month.
- Completes data includes people who began a programme prior to the month they completed that programme.
- A person's eligibility to participate in any particular programme can depend on a number of factors, including their security classification, identified risks and willingness to engage.
- The data includes programme statistics for psychology and rehabilitation and does not include all therapeutic, cultural or employment-related programmes which are offered in prison.

	Starts	Completes
Psychology programmes	1	8
Other programmes	22	16
Rehabilitation programmes	2	4
