

44794 (2025). Hon Dr Ayesha Verrall to the Minister of Health: How many wards across Health New Zealand's hospitals and services, if any, have reported more than 50% of "shifts below target" using the Care Capacity Demand Management programme in the months of July and August 2025, listed by the name of each ward?

Table One: total number of wards reporting more than 50% of shifts below target, July and August, 2022 to 2025

	2022		2023		2024		2025	
	Jul	Aug	Jul	Aug	Jul	Aug	Jul	Aug
Total by month	70	70	68	69	49	42	57	56
Total by two months	140		137		91		113	

Table Two: wards reporting more than 50% of shifts below target, July and August 2022 to 2025, listed by ward:

(note: ticks indicate which months a ward reported more than 50% of shifts below target)

Caveats:

- As the Member will be aware, the CCDM contains 'moment in time' operational data, and is not a direct proxy for unsafe staffing.
- As Health New Zealand has said publicly, using this tool in isolation to claim that wards are under-staffed and unsafe is misleading.
- As part of our continued focus on strengthening the frontline workforce, I am advised that where there is a vacancy to be filled, Health New Zealand is actively recruiting
