NSH Ward 5	16
NSH Ward 7	23
NSH Ward 9	11
Transitional Lounge	8
TTH Rima	7
TTH Rua	31
TTH Toru	8
TTH Wha	29
Tumahu - Ward 11	6

Data extracted 10/12/24

Please note:

- A shift below target does not indicate an unsafe shift depending on the staff mix, skill mix and context of the ward/clinical area at the time.
- This data assumes that districts ensure that TrendCare is correctly completed, which is critical to capturing accurate SBT levels.

The management of staff to best meet acute flow and patient needs requires flexibility and expertise, with decision making from frontline leaders. Variance Response Management systems are used to support decisions on moving staff resources to patient areas in greatest need. We are continuing our work to improve these systems; our ability to respond to patients' needs, and to make best possible use of our highly skilled staff.
